DELACAMP / Future Graphics to be Exclusive Distributor of MK Imaging™ OPC Drums and Toner

Hamburg, GER – DELACAMP and Future Graphics, partners and global leaders in the distribution of quality imaging supplies and components, are very proud to announce an exclusive relationship with Mitsubishi Kagaku Imaging Corporation (MKIC), the world's largest independent developer and manufacturer of organic photoconductor (OPC) drums and Toner, for the purpose of being the sole distributors of its new branded line of products, which will be sold under the name MK Imaging™.

“We are introducing the MK Imaging™ brand to assure our loyal customers that they are purchasing and using products developed and manufactured by MKIC,” stated Toshio Nakai, CEO of MKIC.

“By specifying the MK Imaging™ brand when ordering your OPC and Toner products, you can be confident that you will get the same high quality products that you have used and trusted for years.”

A longtime supplier to the industry, MKIC is globally recognized as one of the world's premier independent manufacturers of precision OPC drums and Toner, and the only major supplier with the technical and manufacturing capability to engineer matched systems of these two critical components, thus enabling innovative market leadership.

“We believe that our partnership with the most recognized independent producer of OPC drums and toners helps position us as the world's preeminent distributors of imaging supplies and components for the aftermarket imaging supplies industry,” said Jürgen Nuppenau, President, DELACAMP. “With their capability of matching OPCs and toner within one single organization, MKIC has unparalleled speed of introducing quality products to the market,” continued Volker Kappius, Vice President, DELACAMP.

DELACAMP/Future Graphics are now the world's exclusive distributor of superior MK Imaging™ branded products and will stock and ship all MK Imaging™ OPC drums and Toner.

MKIC operates five plants with product development centers - all dedicated to the development and production of the aftermarket industry's highest quality OPC drums and Toner.

DELACAMP/Future Graphics possess a combined 23,000 square feet in 4 separate, state-of-the-art labs; two dedicated to laser, one to chips and one to inkjets. The labs are staffed by the most experienced technical personnel with hands-on remanufacturing experience in the aftermarket imaging supplies industry.

FOR A BETTER IMPRESSION

“Without a doubt, we expect the partnership of DELACAMP, Future Graphics and MKIC to position us as unrivaled industry leaders in the distribution of timely, quality imaging supplies,” said Robert Goldstein, President, Future Graphics. “This partnership brings together the hands-on remanufacturing expertise of DELACAMP/FG with the highly technical group in the labs of MKIC,” continued Lionel Brown, COO, Future Graphics. “Forging a relationship with the preeminent manufacturer of OPCs and Toner once again demonstrates our commitment to be a technical leader and to deliver the highest quality products available in our industry.”

“On the laser side of our business we have always strived to offer matched systems that enable us to guarantee specific, quantifiable performance criteria,” said Luke Goldberg, Senior VP of Sales and Marketing. “Clearly toner and drums are the two most critical elements of the system and MKIC, as the largest, most technically advanced producer of OPC drums and Toners, is ideally suited to offer leading-edge systems of the highest quality for pre-existing and new printer technology. We are excited to work with MKIC and fully expect that our already fast-paced release of new products will be greatly enhanced by the technical support from MKIC, the leader in OPC and Toner development.”

“We understand that DELACAMP and Future Graphics have a strong reputation for sales and marketing expertise,” said Mr. Nakai. “They are very efficient distributors with high technical capability, worldwide market coverage, and have flexible service to support customer needs. We believe that we can provide our high quality MK Imaging™ products to our customers with higher satisfaction under this new partnership with DELACAMP and Future Graphics.”

DELACAMP, with the main office located in Hamburg, Germany and Future Graphics, headquartered in San Fernando, California, are leading distributors of supplies to the remanufacturing industry as well as components and spare parts for copier machines worldwide. The two companies, which feature twenty global distribution centers, including five in North America and three in Europe, also offer print auditing software, OEM ink jets, high quality photo paper and a complete line of remanufactured and compatible ink jet cartridges, thermal replacement cartridges/ribbons and compatible replacement solid ink and toner cartridges for Xerox® Phaser printers.

With over 25 years of experience in the imaging supplies industry, MKIC is a top developer and manufacturer of key components of laser beam printers, copiers and fax machines that are used in every possible business and home application. MKIC was the first manufacturer to produce photoconductors with materials that were totally organic and this revolutionary development has now become the industry standard. Today, the company produces over 300 different varieties of safe, long-life organic photoconductor (OPC) drums to meet the many unique needs of our customers. MKIC was also recognized as the early technology leader in the ability to produce a high-quality black toner that resulted in consistent, crisp photo images. Today, the company manufactures a wide variety of products with the unique ability to marry the properties of OPC drums and Toner in virtually any imaging application.
